Megan Ehrnfeldt
mee72@drexel.edu | 484-709-5919 | Philadelphia, PA
Seeking a full-time position where I can utilize my skills in programming and data analysis to foster innovation and promote efficient operations within a dynamic organization.

Education

Drexel University — Philadelphia, PA
Bachelor of Science in Computer Science — Anticipated Graduation: June 2026
Concentrations in AI & Machine Learning and Algorithms & Theory — Cumulative GPA: 3.90
Minors in Data Science and Mathematics

Dean's List 2022-Present
Dean's Scholarship 2022-Present
Pennoni Honors College, 2022-Present

Relevant Coursework

Artificial Intelligence
Machine Learning
Numerical Analysis I
Numerical Analysis II
Data Structures & Algorithms I
Algorithms and Analysis
Systems Architecture
Web Development
Advanced Web Development
Advanced Programming Tools and Techniques(Unix, C)

Skills

Languages: Python, Java, C, JavaScript, HTML/CSS, SQL, React.js
Data Science & Machine Learning:
Concepts: Computer Vision, Pose Estimation, Object Detection, Gait Analysis
Libraries/Frameworks: PyTorch, TensorFlow, Scikit-learn, Pandas, MediaPipe, YOLO
Cloud & DevOps(AWS): S3, Lambda, SageMaker, API Gateway, DynamoDB, Athena, CloudTrail
Data & Analytics Tools: Alteryx, Tableau, Power BI, Power Automate
Developer Tools & OS: Git, GitHub, Docker, Windows, Unix/Linux

Experience

Comcast Corporation — Philadelphia, PA
Indirect Tax Coop — March 2025-September 2025

- Integrated an AI-driven tool into compliance workflows to automate data validation, significantly reducing manual processing time and improving operational efficiency.
- Designed, implemented, and documented a taxability workflow using Alteryx to automate processes for the NBCUniversal division.
- Developed a comprehensive process flowchart to standardize compliance procedures and enhance cross-team clarity.
- Performed taxability research and data analysis to address business inquiries and corrected account balances by auditing historical company returns.

PE Metalworks, Inc — New Freedom, PA
Business Intern — March 2024-September 2024

- Redesigned and modernized the company website using WordPress and HTML, enhancing user experience and accurately representing company services.
- Built Excel-based models of manufacturing processes to analyze production times, identify inefficiencies, and support process improvement efforts.
- Conducted pricing analyses on manufactured products to ensure profitability and maintain competitive service pricing.
- Managed administrative workflows, including list maintenance and project organization, to support daily business operations.

Race-Walking Analysis and Compliance Evaluation
Senior Design Project — September 2025-Present

- Enhanced an existing computer vision system by rapidly learning race-walking biomechanics and competition regulations to inform feature development.
- Expanded a full-stack, cloud-native application by extending its serverless AWS back end, leveraging API Gateway, Lambda, and S3 for scalable video processing and storage.
- Improved the machine-learning pipeline—built with AWS SageMaker and Mediapipe—to increase accuracy in detecting rule violations such as bent knees and loss of ground contact.
- Developed new features for a dynamic, responsive front end using React.js, JavaScript, and Bootstrap, improving usability and visualization of analysis results.
- Utilized AWS DynamoDB for managing user and project metadata and implemented AWS Athena to enable efficient SQL querying of JSON-based results stored in S3.

Activities and Interests

Member, Drexel Swim and Dive Team, Philadelphia, PA, 2022-Present
Member, Women in Computing Society, Drexel University, 2023-Present
Member, Association of Woman in Science, Philadelphia Chapter, 2024-Present
Member, The WICT Network, Greater Philadelphia Chapter, August 2025-Present
